SEO Basics

Basic Angular

HTML/CSS Developer with 1.5 years of hands-on experience in a multi-brand iGaming environment, working across 10+ brands. Comfortable working independently — from Figma mockups to implementing features without designer support when needed. Grew from Trainee to Middle level in 1.5 years. Previous background in navigation data authoring sharpened an eye for precision and working to strict technical specifications.

EXPERIENCE

Middle HTML/CSS Developer

Nov 2024 – Present

BrainRocket Ltd · Limassol, Cyprus

Trainee → Junior → Middle

- Developed and maintained UI across 10+ iGaming brands as part of a brand support team
- Styled new features from core codebase across brand variants; resolved cross-browser bugs including scroll-lock issues, animation glitches, and dynamic image sizing
- Configured PWA assets (icons, apple-touch-icon) and optimized images and animations for smoother load performance
- Independently implemented UI changes without designer availability, using brand guidelines and visual judgment; approved by Product Owner
- Progressed Trainee → Junior (6 months) → Middle (+12 months) via internal skill matrix assessment

Geocoding Specialist

May 2019 – Jun 2021

Intetics

- Authored road network data for navigation systems using proprietary map editing software and video-source footage from street-level capture vehicles
- Extracted and encoded detailed geographic attributes per project scope: road types, lane counts, toll points, traffic signs, speed limits, roundabouts, and built-up area boundaries
- Maintained strict accuracy standards under internal quality inspection (QIL) process
- Tracked tasks, bugs and ambiguities in Jira; documented processes via Confluence and SharePoint
- Collaborated with international teams across calls and async workflows
